

Advantages of Hosted VoIP

- 1- **Lowest total cost of ownership:** your company can have the most advanced technology without significant capital investment. You also save money monthly because you don't need to manage traditional phone lines.
- 2- **Minimum IT support Required:** very little IT support or training necessary to administer due to a very simple web interface.
- 3- **Opex Versus Capex:** no large servers or systems need to be purchased. No capital expenditures that depreciate over time all you have is an affordable monthly fee.
- 4- **Business Continuity:** all equipment reside in a secure and redundant data center so in case of any disaster your business won't be affected.
- 5- **Scalability (up or down):** its very flexible and easy to expand or curtail.
- 6- **High functionality –** it offers many features and flexibility such as being able to place phone calls from outside the office and appear as if you are calling from the office; voicemails automatically forwarded to your email account.
- 7- **Automatic updates:** because the system is hosted, the upgrades happen continuously without client having to make any work (there is no box that need to be upgraded): software upgrades happen in the background.
- 8- **Productivity anywhere-** this solution is ideal for those that need to produce from anywhere, on the go. It gives companies the hability to keep moving forward no matter where business is done.
- 9- **Video On-** being able to see facial expressions and to get more personal and productive. Its very easy to get started with video with hosted VoIP.
- 10- **Focus on what matters:** companies should focus on what their core business is to stay competitive, taking down obstacles that stand in their way.
